Hi, Not sure where to place this, either here on on the elog... I just received notification from Uwe S. that the water cooling installation of building 26 (hooking up the electronics to control the pumps etc) will be finished this week (KW 11). Sergio

The Smartscope has been moved from E-lab 1 to the assembly hall of building 26 and is operational again. The OGP technician damaged the glass cover by accident. They will replace it free of charge as soon as possible. The machine can still be used normally, just avoid operating it on the damaged region. In the next days we will add the vacuum pump and its feed-throughs. Cheers, Sergio
