

# Matter and Technologies

**MATTER AND  
TECHNOLOGIES**

Matter and Technologies is a program within the research area Matter of the Helmholtz Association. Matter and Technologies (MT) develops technologies for accelerators and detectors which are needed by the experiments and projects of the Helmholtz association and beyond. The program collaborates closely with the other programs in the research area matter (Matter and the Universe, MU, and From Matter to Materials and Life, MML).

Topic "Accelerator Research and Development", ARD

Topic "Detector Technologies and Systems", DTS

2018 Annual Meeting: <https://indico.desy.de/indico/event/19923>
