

IT-Linux

Welcome to the home of the DESY IT Linux Users documentation!

The Linux operating system has a long history at DESY.

Linux is a clear workhorse for many scientific instruments as well as a strong pillar for general services.

These pages detail:

DESY IT provides powerful computational resources based on Linux as a service. Details of these resources can be found elsewhere:

- The [Maxwell](#) HPC cluster
- [The NAF - National Analysis Facility](#)
- [General batch computing resource: BIRD](#)
- [Public, interactively accessible Linux Server](#)
