

Python3 update

with the update last week (2.9.2019) we removed all remaining python34 packages, because python3.4 has reached end of life (<https://www.python.org/downloads/release/python-3410/>)

And so the third party repository also don't offer it anymore.

DESY also provided some packages for 3.4 and not all of them are rebuilt for 3.6 now. So if you miss a package give us an email at maxwell.service@desy.de
