

fiji

Fiji is an image processing package—a "batteries-included" distribution of [ImageJ](#), bundling a lot of plugins which facilitate scientific image analysis.

Information

- **Source:** <https://fiji.sc/>
- **License:** the majority of Fiji is licensed under the GNU Public License version 2. Exceptions are listed in the [LICENSES](#) file.
- **Path:** `/usr/bin/fiji` on [maxwell](#)
- **Documentation:** <https://imagej.net/Introduction>
- **Citation:** Please have a look at <https://imagej.net/Citing>

Availability:

	RedHat SL6	https://fiji.sc/#download
	RedHat EL7	pre-installed in system path on maxwell only!
	Other linux	https://fiji.sc/#download
	Windows	https://fiji.sc/#download
	Mac OSX	https://fiji.sc/#download

Using fiji on maxwell

There is no need for any special setup, just issue 'fiji'. A recent kernel security fix (stack guard gap) causes problems with some java applications like fiji. The kernels effected are: 3.10.0-514.21.2.el7. If fiji crashes right at the beginning, please try the following workaround:

```
[max]% fiji -Xss2m --
```
